RETRACTED: Estimation of genomic ancestry in admixed populations [version 1; peer review: retracted]

David A. Eccles^{1,2}, Geoffrey K. Chambers¹, Rodney A. Lea²

¹School of Biological Sciences, Victoria University, Wellington, New Zealand

²Environmental Science and Research, Porirua, New Zealand

Retraction

This paper has been retracted by the authors following advice from the Health and Disability Ethics Committees (HDECs). We have taken this step to respect the expressed wishes of iwi representatives who have stated that they do not want the results of this study to be published. In light of this, the content of the article has also been removed.

Regrettably this also means that the referee reports from Michael Barnes, Kaustubh Adhikari and Juan Camilo Chacón-Duque have had to be removed; however, we thank them for their help with the peer review process.

Open Peer Review

Current Peer Review Status: RETRACTED

The benefits of publishing with F1000Research:

- Your article is published within days, with no editorial bias
- You can publish traditional articles, null/negative results, case reports, data notes and more
- The peer review process is transparent and collaborative
- Your article is indexed in PubMed after passing peer review
- Dedicated customer support at every stage
